EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Robert G. Weilacher (Reg. 20,531) on April 10, 2009.

The application has been amended as follows:

Claims 17: (currently amended): A multilayer wiring board comprising (i) a plurality of single-sided wiring boards having a wiring pattern formed on one side of a substrate made of an insulating material and two-layer conductor posts made of copper and a metal or copper and an alloy, each of said conductor posts projecting from said wiring pattern to a side of said substrate opposite from said wiring pattern, with each substrate other than that of an outermost layer having, on the side opposite from said conductor posts, a plurality of pads for making connection to the conductor posts, and said wiring pattern having no surface coating, (ii) a flexible wiring board having on at least one side thereof the pads for connection to said conductor posts and comprising a wiring pattern with surface coating applied on a flexible portion but substantially no surface coating applied on a multilayer rigid portion, and (iii) an adhesive layer having a flux function whereby respective boards are laminated integrally, forming the multilayer

rigid portion, wherein said conductor posts and pads are connected by a metal or an alloy through the medium of said adhesive layer, and said wiring patterns are electrically connected.

Claims: 1-16: Cancel.

Claims: 21-24: Cancel.

Claims: 28-32: Cancel.

2. The following is an examiner's statement of reasons for allowance:

A multilayer wiring board with the limitations "a flexible wiring board having on at least one side thereof the pads for connection to said conductor posts and comprising a wiring pattern with surface coating applied on a flexible portion but substantially no surface coating applied on a multilayer rigid portion" and "an adhesive layer having a flux function whereby respective boards are laminated integrally, forming the multilayer rigid portion, wherein said conductor posts and pads are connected by a metal or an alloy through the medium of said adhesive layer, and said wiring patterns are electrically connected" in combination with other claimed limitations of base claim 17, has not been fairly suggested or disclosed by prior art of record, taken alone or in combination.

3. Claims 25-27, previously withdrawn from consideration as a result of a restriction requirement, are hereby rejoined and fully examined for patentability under 37 CFR

Art Unit: 2841

1.104, as they depend (directly or indirectly) upon and include all the limitations of the allowable base claim 17

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ishwar (I. B.) Patel whose telephone number is (571) 272 1933. The examiner can normally be reached on M-F (8:30 - 5:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dean Reichard can be reached on (571) 272 1984. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
